Defendant's Affidavit:

~9:35 am Tuesday, April 9, 2019

- I was travelling west on F Road, approaching H Road.
- There had been an accident as evidenced by a firetruck across the intersection of F and H Roads (on the west side of H Road). The firetruck was blocking the oncoming traffic turn lane of F Road on the west side of H (on the opposite side of the intersection where I arrived) and part of the F Road Lane farthest to the south. The north two lanes were open to traffic. There were no longer any accident vehicles present when I arrived at this intersection. Neither was there any blockade by a police vehicle or any traffic cones or any kind of cordoning off of the intersection.
- I slowed down to a stop and observed the situation to decide what to do. I was in the second lane from the right (north side). There was tractor trailer truck in the right turn lane that attempted to turn right and was blocking both turn lanes so I could not turn right.
- Since I was on the right side, I could not turn left due to westbound traffic, which were turning to the left, going south on H Road.
- There was a fireman (wearing an orange vest) standing in the intersection by his firetruck and I thought he motioned me to slowly proceed through the intersection on F Road. I hesitated and looked around and thought he motioned to me again. So, I proceeded slowly through the intersection. I slowed to a stop near the firemen to allow him to give me directives, but I thought he motioned me through.
- Once past the accident scene I entered the A's grocery store parking lot to do my intended shopping.
- A policeman entered the lot and cited me for disregarding a policeman's directives.
 - I did not see a police officer in the intersection directing traffic while I was passing through.
